

YOU SHIFT GEARS

On your automobile when you come to a hill and want to get more power out of it—Don't you? And then when you strike a good piece of road you would come back into high gear—Wouldn't you? The THOMAS TWO SPEED CROWN MOWER is constructed and made to work on this same theory. That is you don't have to run the mower all the time on the fast or lopsided, required for heavy cutting, but instead shift over into your slower or high speed for all ordinary, medium grass and hay, thus saving a great deal of unnecessary wear on the machine, which naturally prolongs its life and keeps it in better running order. Come in and examine our mounted working model of the THOMAS TWO SPEED CROWN MOWER.
